Dear Madam/Sir,

As we reported in the previous years, we are going to inform You every year about the applications we can accept next year.

Hungarian prospective adoptive parents accept nearly all small healthy children and they have become more tolerant to adopt the elder children as well. For the intercountry adoption we can offer children under 7 years old who have some healthy, mentally or behaviour problems.

In 2011 we do not accept any applications for adoption of healthy children under 7 years old.

In 2011 from every accredited body or competent authority we accept:

- 10 applications for the adoption of a child or siblings above 7,
- 5 applications for the adoption of a child under 7, who is ill or mentally retarded or has behaviour problems,
- 5 applications for the adoption of three or more siblings under 7 years.

We do not accept any applications from singles wishing child under 10. From singles we accept only applications for the adoption of a child/children above 10 years old. We accept applications without any limit from couples who want to adopt children elder than 10 years old.

As we referred that we oversee our registry every year and we inform You at the end of 2011 about the applications we accept in 2012.

Best regards

Zoltán Dudas
head of department
